Mr. Marc McKenna  
Navajo Generating Station  
Salt River Project  
P.O. Box 850  
Page, AZ 86040

Dear Mr. McKenna:

This correspondence refers to the removal of 12 underground storage tanks (USTs) at the Navajo Generating Station, located five miles east of Page, Arizona, on State Route 98. This facility is located on land of the Navajo Nation.

Soil contamination from gasoline, diesel fuel, lubricating oil and waste oil was verified at 10 of the 12 USTs. All contaminated soil was removed, mixed with coal and incinerated at the power plant.

Our review of the closure documents and analytical results for soil samples collected at the UST site indicates no hydrocarbon concentrations above appropriate EPA, Region IX or tribal soil cleanup levels.

The information submitted has assisted EPA in assessing the status of this site, where 12 USTs were removed on September 25, 1991. This site does not appear to pose a current threat to human health and the environment. Therefore, EPA is not requiring further action at this time.

If new USTs are installed at the site, Tank Notification Form #7530-1 must be completed and sent to this office and to the Navajo Nation EPA within 30 days after startup of the new UST system. Please call Walt Guggenheimer at (415) 744-2094 if you have questions or need more information.

Sincerely,

*Marsha Glassner*  
Lester Kaufman, Chief
